OBJECTIVE

Software Development Engineer with 2+ years of experience building scalable full-stack applications using React.js, Node.js, JavaScript, and MySQL. Skilled in developing responsive web platforms, REST APIs, authentication systems, and admin dashboards, with hands-on experience deploying production applications using modern hosting and domain management tools. Proven ability to manage end-to-end development from architecture to deployment. Currently expanding expertise in AI automation and intelligent workflow integration to build modern software solutions.

EDUCATION

Bachelor of Computer Application, MATS University 2023

SKILLS

Languages :-	Java, JavaScript, TypeScript, SQL, HTML, CSS.
Frontend Development :-	React.js, AngularJS, Responsive Design, UI/UX.
Backend Development :-	Node.js, Express.js, REST APIs, Authentication.
AI and Automation :-	AI Agents, Prompt Engineering, Workflow Automation.
Tools and Databases :-	Git, GitHub, Netlify, DNS, SSL ,MySQL, Firebase , VsCode.

EXPERIENCE

Software Development Engineer (SDE 1) Navbodh Prakashan	Oct 2025 - Present <i>Raipur</i>
---	-------------------------------------

- Developed and deployed 8+ responsive production websites using React.js, JavaScript, and modern CSS.
- Worked on AI automation agents including MoltBot AI and OpenClaw AI for workflow automation and digital content processing.
- Integrated AI tools and automation workflows for image enhancement and digital content generation.
- Built full-stack systems including frontend UI, REST APIs, database integration, and authentication workflows.
- Implemented Firebase authentication and database systems for secure login, order management, and dashboard reporting.

Software Engineer Interbiz Consulting Pvt Ltd	Nov 2023 - Apr 2024 <i>Raipur</i>
---	--------------------------------------

- Improved and optimized multiple pages of the Rovicare healthcare platform, enhancing user interface and application performance.
- Migrated application state management to NgRx architecture improving scalability and maintainability of the frontend codebase.
- Enhanced CS Dashboard functionality by implementing data filters, sorting modules, and responsive layouts.
- Resolved performance bottlenecks and UI issues improving overall usability and application responsiveness.
